ICNS 2023

ICNS Introduction

The ICNS Conference highlights research on themes in cultural neuroscience and emerging issues for training and advocacy.

Goals of the ICNS 2023 Conference

- To promote an international scholarly society in cultural neuroscience.
- To support the scholarly activity of research, training and advocacy on cultural neuroscience.
- To support international cooperation and scientific progress in cultural neuroscience.
- To promote global awareness of emerging issues in cultural neuroscience.

ICNS 2023

ICNS Welcome Remarks

Theme on Maternal and Child Health

Dear Conference Participants,

We are delighted to welcome all to The ICNS 2023 Conference on Maternal and Child Health of The International Cultural Neuroscience Society.

The conference highlights the thematic topics of importance to the promotion of maternal and child health. The research, practice and advocacy of maternal and child health is fundamental to the promotion of health and human development. The promotion of maternal and child health is foundational to the health and well-being of individuals, societies and nations.

The conference theme aims to promote the capacity development of programs and policies of maternal and child health. The mental health promotion on maternal and child health is fundamental to the promotion of the cultural development of health and human development that is life-long.

The conference theme of the year promotes scientific and educational enrichment on maternal and child health. The international cooperation on maternal and child health is foundational to the promotion of the highest standards of health and well-being for the health equity of all. The conference supports the advocacy and policymaking in recognition of International World Health Day.

We are truly grateful to members for their support.

Kind regards,

Dr. Tamara-Lewis Johnson, National Institutes of Health

Dr. Joan Chiao, International Cultural Neuroscience Consortium

ICNS Awards and Prizes Ceremony

International Cultural Neuroscience Society

Awards and Prizes

2023 Recipients

Distinguished Scientist Award

The Distinguished Scientist Award is in recognition of an outstanding achievement in the senior career of a scientist in the field of cultural neuroscience.

Dr. Hidetsugu Komeda

Mentoring Scientist Award

The Mentoring Award is in recognition of an outstanding mentorship to training scientists in the field of cultural neuroscience.

Dr. Norihiro Sadato

Young Investigator Award

The Young Investigator Award is in recognition of outstanding achievement in the early career of a scientist in the field of cultural neuroscience.

Dr. Joshua Goh

ICNS 2023

ICNS Awards and Prizes Ceremony

International Cultural Neuroscience Society

Awards and Prizes

2023 Recipients

Science and Diplomacy Award

The Science and Diplomacy Award is in recognition to a scientist or group of scientists whose exemplary contributions in the field of cultural neuroscience represent outstanding efforts in science and diplomacy.

Dr. Tokiko Harada

Outstanding Humanitarian Award

The Outstanding Humanitarian Award is in recognition to an individual or group whose exemplary contributions in the field of cultural neuroscience represent outstanding humanitarian efforts in science and diplomacy.

Dr. Robert Truner

Dr. Shu-Chen Li

Dr. Beverly Pringle

ICNS 2023

ICNS Awards and Prizes Ceremony

International Cultural Neuroscience Society

Awards and Prizes

2023 Recipients

Fields Prize

The Fields Prize is in recognition of a significant accomplishment that represents a substantial contribution to two or more related areas in the field of cultural neuroscience.

Dr. Joshua Goh

Innovation Prize

The Innovation Prize is in recognition of a theoretical or methodological innovation that represents a significant advancement in the potential for discovery and delivery science in the field of cultural neuroscience.

ICNS Forum on Cultural Neuroscience and Human Rights

Co-Sponsor International Cultural Neuroscience and Human Rights Network

ICNS Forum on Cultural Neuroscience and Human Rights

Ensuring maternal and child health is necessary for sustainable development. Maternal and child health are a fundamental component of the fulfillment of human rights. Research in cultural neuroscience contributes to the discovery and delivery science of cures, preventions and interventions in global mental health. The goal of this meeting is to discuss contributions in cultural neuroscience to achievement of the highest standards of maternal and child as a fulfillment of health and human development. The presenters will speak on cultural neuroscience and the fulfillment of human rights.

ICNS 2023

ICNS Closing Remarks

Dear Conference Participants,

Thank you for attending the ICNS 2023 Conference on Maternal and Child Health of The International Cultural Neuroscience Society.

We are delighted to highlight the importance of maternal and child health. Maternal and child health is a chief priority of international and national promotion on health and human development. The promotion of maternal and child health is fundamental to the scientific and educational enrichment on health and human development.

The conference highlights the key priorities on maternal and child health that are beneficial to the promotion of health and human development. The promotion of cultural development of health and human development is fundamental to the cultural development of health and well-being that is life-long.

The advocacy of maternal and child health is fundamental to the promotion of health and human development. The building of awareness on world health is essential to health equity for all.

We are truly grateful to members for their support. We hope to see you next year.

Kind regards,

Joan Chiao

ICNS 2023

ICNS 2023 Advocacy and Policymaking

Maternal and Child Health

The ICNS 2023 Conference Theme on Maternal and Child Health centers on the international cooperation to support scientific research on mental health around the world.

The ICNS 2023 Conference highlights research on cultural influences on health and well-being.

Research themes of the ICNS 2023 Conference include the following:

- Cultural neuroscience
- Culture, cognition and aging
- Cultural neuroscience and global mental health
- Cultural neuroscience and public policy

The ICNS 2023 Conference supports international research and training on cultural neuroscience that builds global awareness of mental health.

- Build awareness of the importance of mental health around the world.
- Share international research on cultural neuroscience.
- Discuss the impact of international research on cultural neuroscience for mental health practice.
- Discuss the impact of international research on cultural neuroscience on mental health reform.
- Connect with other cultural neuroscience researchers on emerging issues in global mental health.

ICNS 2023

Advocacy

World Health Day

7 April of 2023

Build Awareness of World Health

ICNS 2023

ICNS Conclusion

The ICNS 2023 Conference promotes the scholarly activity of the members of the ICNS.

The ICNS 2023 Conference supports the international cooperation for the advancement of scientific progress in cultural neuroscience.

The ICNS 2023 Conference supports international research and international training in the field of cultural neuroscience.

The ICNS 2023 Conference promotes global awareness of emerging issues in cultural neuroscience and global mental health as well as cultural neuroscience and public policy.
