ICNS 2020

ICNS Introduction

The ICNS Conference highlights research on themes in cultural neuroscience and emerging issues for training and advocacy.

Goals of the ICNS 2020 Conference

- To promote an international scholarly society in cultural neuroscience.
- To support the scholarly activity of research, training and advocacy on cultural neuroscience.
- To support international cooperation and scientific progress in cultural neuroscience.
- To promote global awareness of emerging issues in cultural neuroscience.

ICNS 2020

ICNS Welcome Remarks

Welcome to the 2020 virtual meeting of the International Cultural Neuroscience Society!

We are impressed by the level of interest shown in this meeting, with nearly 200 people registered to attend. This meeting may represent one of the few ways which the COVID-19 pandemic is enhancing our ability to come together; As we are spread across the globe and based in different subareas of Neuroscience and Psychology, it is unlikely that we would find a location and conference that is convenient for so many of us to attend.

Some attendees are using this meeting to introduce their classes or lab groups to research in Cultural Neuroscience, allowing us outreach that usually would not be possible. During the meeting, we encourage you to participate and to discuss the presentations as well as share your thoughts about the field and ideas about how to coordinate future interactions and events.

Finally, I would like to thank Dani Schwartz for administrative support for the meeting and Joan Chiao for maintaining the ICNS organization and with us organizing this meeting.

Sincerely,

Dr. Angela Gutchess, on behalf of co-organizers Dr. Joshua Goh and Dr. Elizabeth Losin

ICNS Awards and Prizes Ceremony

International Cultural Neuroscience Society

Awards and Prizes

2020 Recipients

Distinguished Scientist Award

The Distinguished Scientist Award is in recognition of an outstanding achievement in the senior career of a scientist in the field of cultural neuroscience.

Dr. Nalini Ambady

Dr. Robert Zajonc

Dr. Joan Chiao

Dr. John Gabrieli

Dr. Hazel Markus

Mentoring Scientist Award

The Mentoring Award is in recognition of an outstanding mentorship to training scientists in the field of cultural neuroscience.

Dr. Mirella Dapretto

Young Investigator Award

The Young Investigator Award is in recognition of outstanding achievement in the early career of a scientist in the field of cultural neuroscience.

Dr. Elizabeth Losin

ICNS 2020

ICNS Awards and Prizes Ceremony

International Cultural Neuroscience Society

Awards and Prizes

2020 Recipients

Science and Diplomacy Award

The Science and Diplomacy Award is in recognition to a scientist or group of scientists whose exemplary contributions in the field of cultural neuroscience represent outstanding efforts in science and diplomacy.

Dr. Pamela Collins

Outstanding Humanitarian Award

The Outstanding Humanitarian Award is in recognition to an individual or group whose exemplary contributions in the field of cultural neuroscience represent outstanding humanitarian efforts in science and diplomacy.

Dr. Laurence Kirmayer

Dr. Robert Lemelson

ICNS 2020

ICNS Awards and Prizes Ceremony

International Cultural Neuroscience Society

Awards and Prizes

2020 Recipients

Fields Prize

The Fields Prize is in recognition of a significant accomplishment that represents a substantial contribution to two or more related areas in the field of cultural neuroscience.

Dr. Angela Gutches

Dr. Denise Park

Innovation Prize

The Innovation Prize is in recognition of a theoretical or methodological innovation that represents a significant advancement in the potential for discovery and delivery science in the field of cultural neuroscience.

ICNS Forum on Cultural Neuroscience and Human Rights

Ensuring good health and well-being is necessary for sustainable development. Mental health and well-being are a fundamental component of the fulfillment of economic social and cultural rights. Research in cultural neuroscience contributes to the discovery and delivery science of cures, preventions and interventions in global mental health. The goal of this meeting is to discuss contributions in cultural neuroscience to achievement of the highest standards of health and well-being as a fulfillment of economic, social and cultural rights. The presenters will speak on cultural neuroscience and the fulfillment of human rights.

ICNS 2020

ICNS Closing Remarks

Dear Conference Participants,

Thank you for attending the 2020 Conference on Health and Well-Being of the International Cultural Neuroscience Society. We are delighted to highlight the importance of health equity in a global context. Health equity is fundamental and necessary for the development of individuals, societies and nations.

Mental health promotion that ensures health equity ensures the attainment of health and well-being for all. Evidence-based approaches in cultural neuroscience inform the practice and policy of health. Advancement of research in cultural neuroscience furthers understanding of preventions and interventions in mental health for the aging population. Research in cultural neuroscience contributes to addressing grand challenges in global mental health.

Research in cultural neuroscience helps to inform advocacy and policymaking in human rights. International and national initiatives for research and training in cultural neuroscience contribute to capacity building and research infrastructure in mental health.

Building awareness of mental health is important for the attainment of health equity in a global context. We are truly grateful to members for their support. We look forward to seeing you next year.

Sincerely,

Dr. Joan Chiao

ICNS 2020

ICNS 2020 Advocacy and Policymaking

Health and Well-Being

The ICNS 2020 Conference Theme on Health and Well-Being centers on the international cooperation to support scientific research on mental health around the world.

The ICNS 2020 Conference highlights research on cultural influences on Health and Well-Being.

Research themes of the ICNS 2020 Conference include the following:

- Cultural neuroscience
- Culture, cognition and aging
- Cultural neuroscience and global mental health
- Cultural neuroscience and public policy

The ICNS 2020 Conference supports international research and training on cultural neuroscience that builds global awareness of mental health.

- Build awareness of the importance of mental health around the world.
- Share international research on cultural neuroscience.
- Discuss the impact of international research on cultural neuroscience for mental health practice.
- Discuss the impact of international research on cultural neuroscience on mental health reform.
- Connect with other cultural neuroscience researchers on emerging issues in global mental health.

ICNS 2020

Advocacy

World Mental Health Day

10 October of 2020

Build Awareness of Global Mental Health

ICNS 2020

ICNS Conclusion

The ICNS 2020 Conference promotes the scholarly activity of the members of the ICNS.

The ICNS 2020 Conference supports the international cooperation for the advancement of scientific progress in cultural neuroscience.

The ICNS 2020 Conference supports international research and international training in the field of cultural neuroscience.

The ICNS 2020 Conference promotes global awareness of emerging issues in cultural neuroscience and global mental health as well as cultural neuroscience and public policy.
